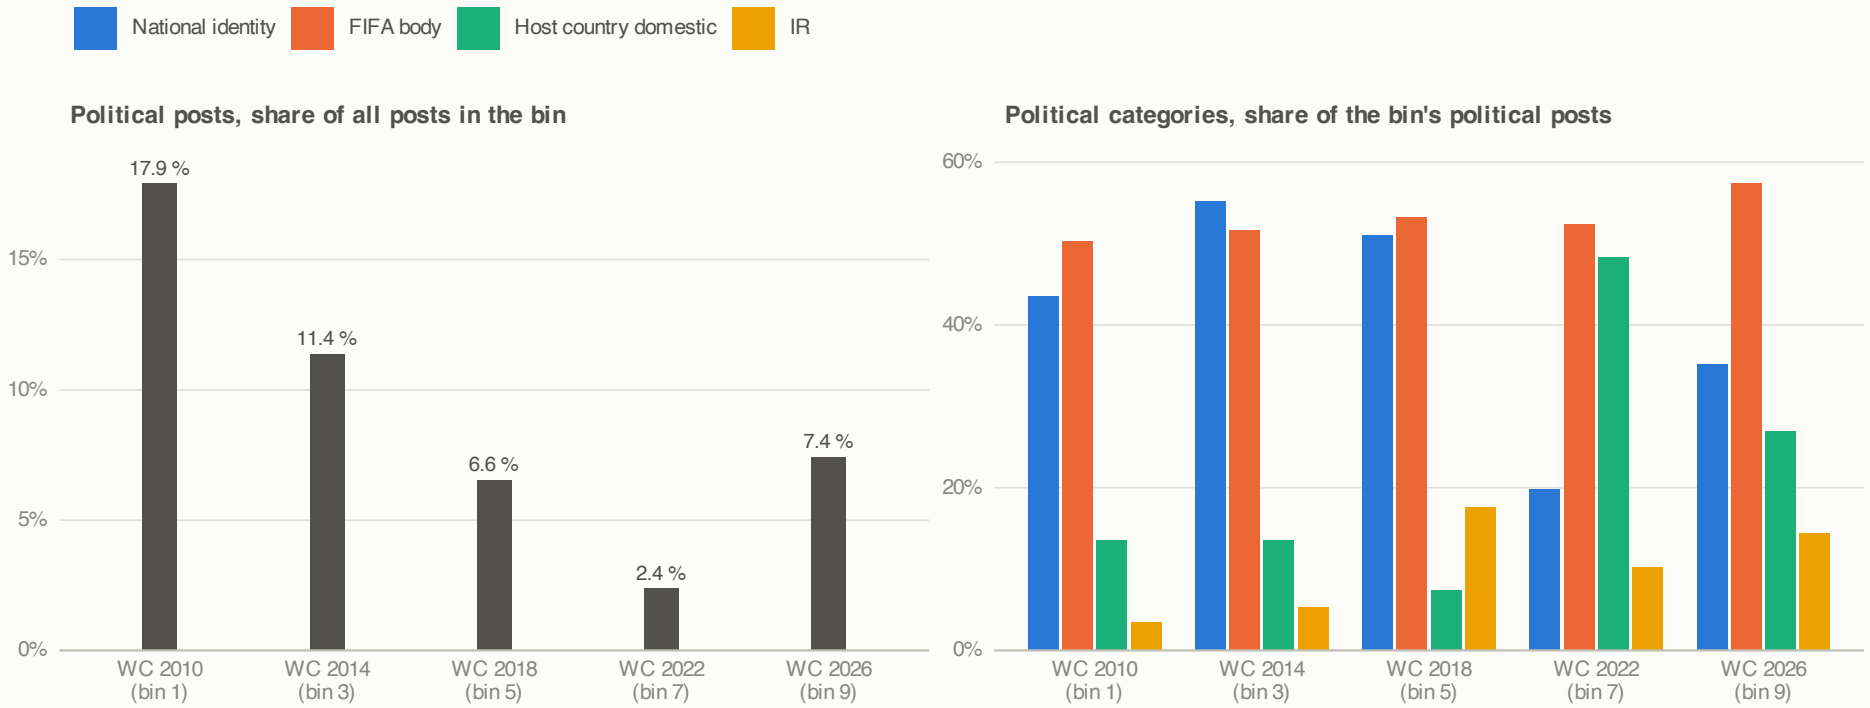
Political posts in the five World Cup period bins

Left: posts in topics coded political, as a share of all posts in the bin. Right: share of those posts whose topic carries each political category



Political = topics coded political in the co-authors' QUALTAG review (qt_political = yes; REVIEW and not-yet-settled topics excluded). Counted: posts in their HDBSCAN cluster or singly reassigned to a political topic (20,869 posts); dual-topic and outlier posts are not counted as political. A topic can carry more than one category, so the right-hand shares of a bin can add up to more than 100 %. Other denominators and the REVIEW posts: tab_E1_political_posts.csv.
